

TECHNICAL CHARACTERISTICS

wineo PE vapour barrier PE film for laminate flooring			wineo
Product thickness	0,125 mm		
Format	Width: 1,00 m Length: 30,00 m		
Roll / m²	1 / 30 m²		
Rolls / m² per pallet	100 / 3000 m²		
Technical details			
S _D Water vapor diffusion	≥ 100	EN 1931	
RTF Reaction to fire	E B2	EN 13501-1 DIN 4102	
Product description	Plastic vapour barrier membrane made of polyethylene - Thin PE foil for use under all hard floor coverings (not required for wooden substrates). - serves as a separating layer between screed and underlay material.		
Installation reference	Lay the PE vapour barrier on a dry subfloor, ready for finishing. If the room exceeds the width of the material or whenever joints become necessary, the individual widths have to be layed overlapping by > 20 cm. Is the PE vapour barrier used as a moisture barrier underneath wineo laminate floors, the joints do not need to be sealed by tape normally. However, in case of extreme moisture or for special requirements, the joints have to be sealed by means of tape.
